

AFSAL K P

MERN Stack Developer | Full-Stack Engineer

afsalkp4343@gmail.com | +91 9074784343 | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Results-driven MERN Stack Developer with a strong foundation in Clean Architecture, TypeScript, and full-stack web development. Hands-on experience building production-grade applications using React.js, Node.js, Express.js, and MongoDB. Developed GridSync — an AI-powered project management platform featuring real-time Kanban boards (Socket.IO), RAG-based semantic search, and Stripe subscription management, deployed on AWS EC2. Brings 4 years of enterprise IT operations experience from Wipro, providing deep insight into system reliability, incident management, and SLA-driven delivery. Seeking a junior full-stack / MERN developer role where I can contribute across the entire React/Node stack from day one.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), TypeScript
Frontend	React.js, Redux Toolkit, React Hooks, Context API, HTML5, CSS3, Tailwind CSS, Bootstrap
Backend	Node.js, Express.js, REST API Design, Socket.IO, JWT Authentication, bcrypt
Database	MongoDB (Atlas, Vector Search), Mongoose, SQL
Architecture	Clean Architecture, MVC, RESTful API, Microservices (basic)
DevOps & Tools	AWS EC2, Docker (basic), Git, GitHub, Postman, CI/CD (basic), Nginx (basic), PM2
AI / ML	RAG Pipelines, @xenova/transformers, MongoDB Vector Search, Groq API
Testing	Jest, Postman API Testing
Soft Skills	Problem Solving, Teamwork, Communication, Adaptability, Agile/Scrum

WORK EXPERIENCE

L1 Application Support Engineer

Dec 2019 – Dec 2023

Wipro Limited · Kannur, Kerala, India

Application: Finacle Core Banking System (Infosys)

- Maintained application health for Finacle core banking system, ensuring high availability and minimal downtime for critical banking operations across multiple client environments.
- Monitored and triaged incident tickets using ServiceNow, achieving consistent SLA compliance and reducing mean time to resolution (MTTR) through structured prioritization workflows.
- Performed first-line troubleshooting for application-layer issues including login failures, transaction processing errors, session timeouts, and performance degradation.
- Analyzed application logs, system alerts, and database traces to perform root cause analysis (RCA) and implement quick fixes or documented workarounds for recurring incidents.
- Managed and monitored EOD (End of Day) and BOD (Beginning of Day) batch processes, proactively identifying failures and escalating with full context to minimize business impact.
- Escalated complex and P1/P2 incidents to L2/L3 engineering teams with complete documentation — including logs, error traces, impact analysis, and reproduction steps — reducing back-and-forth resolution cycles.

- Handled user access management tasks including password resets, account unlocks, role-based access provisioning, and audit log reviews in compliance with security policies.
- Collaborated cross-functionally with development, DBA, and infrastructure teams to resolve production issues, contributing to system performance improvements and process optimizations.
- Received formal Commendation Certificate from Wipro for consistent high performance and exceptional SLA adherence throughout tenure.

PROJECTS

GridSync — AI-Enhanced Project Management & Collaboration Platform

[GitHub ↗](#) [Live ↗](#)

React.js · Node.js · MongoDB · TypeScript · Socket.IO · AWS EC2 · Stripe · Groq API

- Architected a full-stack SaaS collaboration platform using Clean Architecture (Repository pattern), strictly decoupling business logic from Express.js controllers and React UI layers to ensure long-term maintainability.
- Built a real-time Kanban board and group chat using Socket.IO with room-based event handling, supporting concurrent multi-user state synchronization without page refresh.
- Designed a RAG (Retrieval-Augmented Generation) pipeline using @xenova/transformers for client-side text embeddings, MongoDB Vector Search for semantic document retrieval, and Groq LLaMA API for context-aware response generation — enabling natural language queries over project documentation.
- Integrated Stripe payment gateway to manage user subscriptions and premium access tiers, including webhook handlers for subscription lifecycle events.
- Deployed on AWS EC2 with environment parity across development and production; configured Nginx as a reverse proxy and PM2 for process management.

Lux-ous — Full-Stack E-Commerce Platform

[GitHub ↗](#)

React.js · Node.js · Express.js · MongoDB · Razorpay · OAuth 2.0 · MVC Architecture

- Built a secure, responsive e-commerce application with product catalog, cart management, and checkout flows using React.js frontend and a Node.js/Express.js REST API backend with JWT session management and bcrypt password hashing.
- Developed a comprehensive Admin Dashboard with data visualization for sales reporting (Excel/PDF export) and real-time inventory management, significantly reducing manual tracking overhead.
- Implemented MVC Architecture to cleanly separate Mongoose data models, Express controllers, and view logic, enabling independent feature development and easier onboarding.
- Integrated Razorpay for secure payment processing and Google OAuth 2.0 for streamlined social authentication, improving conversion and login UX.

EDUCATION & CERTIFICATIONS

Web Development — MERN Stack Bootcamp

Dec 2023 – Dec 2025

Prototype Institute · Intensive Full-Stack Program

Focused on Data Structures, Algorithms, system design, and modern full-stack web development practices.

Bachelor of Commerce — Computer Applications

Jun 2014 – Aug 2017

Mary Matha Arts and Science College, Calicut University

ACHIEVEMENTS

- Google Foobar Challenge (2022): Invited to participate in Google's exclusive coding challenge, demonstrating proficiency in advanced algorithm design and problem solving.
- Wipro Commendation Certificate: Received formal recognition for consistent high performance and outstanding SLA compliance across 4 years of service.
